

RIMJHIM SRIVASTAVA

rimjhimsrivastava971@gmail.com · +91-8736826766 · LinkedIn · GitHub · Portfolio

Summary

IT graduate passionate about software development, full-stack and AI-driven web development. Experienced in building production-ready, data-driven applications using the MERN stack and machine learning — including an IEEE-published project and applied AI experience through an IBM-affiliated program

Education

Bachelor of Technology in Information Technology

2022 – 2026

United College of Engineering and Research, Prayagraj, Uttar Pradesh

CGPA: 8.03

Technical Skills

Programming Languages

Python, C++, Java

Web Development

Frontend: React.js, HTML, CSS, JavaScript

Backend: Node.js, Express.js, Spring Boot

Databases

MongoDB, SQL

AI / ML

Machine Learning, NLP, Recommendation Systems

Tools & Platforms

Git/GitHub, VS Code, Streamlit, Vercel, Render

Virtual Internships & Programs

IBM PBEL Virtual Internship – Artificial Intelligence

2025

IBM

- Selected for stipend-based virtual internship focused on applied Artificial Intelligence
- Developed AI-powered chatbot using NLP and IBM Watson Assistant for personalized recommendations
- Applied machine learning concepts to real-world business scenarios through structured curriculum

Full-Stack Development Virtual Internship

July 2025 – August 2025

Skillbit Technologies

- Completed hands-on training building full-stack applications using React, Node.js, and Express
- Learned RESTful API development and database integration with MongoDB through guided projects
- Gained exposure to agile development workflows and industry best practices

Deloitte Data Analytics & Technology Job Simulation

2025

Deloitte

- Completed virtual program focusing on data analytics methodologies and technology consulting practices

Tata Group GenAI Data Analytics Job Simulation

2025

Tata Group

- Participated in program exploring Generative AI foundations, prompt engineering, and enterprise AI applications

Technical Projects

AI-Powered Smart Cloud Kitchen

MERN, FastAPI, ML, BERT

Live Demo: cloud-kitchen-frontend-eulf.onrender.com

- Built a production-deployed full-stack cloud kitchen platform with AI-driven food ordering and personalized recipe discovery
- Engineered a hybrid recommendation engine combining TF-IDF, BERT embeddings, and collaborative filtering
- IEEE-published and awarded 1st position at Technovanza 2026 (UGI Project Exhibition)

AI-Powered Hybrid Tutor Finder Platform

React, Node.js, Express.js, MongoDB, Gemini AI

UHACK 4.0 | Team: DeepThink Labs

March 2026

GitHub: github.com/AniketMishra8/Tutor-Finder | Live: deepthinktut.netlify.app

- Built a full-stack AI-powered tutor-student matching platform with role-based dashboards for students, teachers, and parents
- Integrated Gemini AI chatbot, gamified learning features (badges, streaks, leaderboards), and a 250+ question quiz system with ML-driven performance classification
- Developed as part of UHACK 4.0 — a hackathon backed by IEEE, Google Developer Groups, and Institution's Innovation Council (Ministry of HRD)

Personal Blog Platform

React, Node.js, MongoDB, Express

GitHub: github.com/Rimjhim117/blog-platform | Live: blog-platform-42z2.onrender.com

- Developed full-stack blogging platform with JWT-based authentication and CRUD operations
- Optimized MongoDB queries and implemented responsive UI for improved cross-device usability

Readora – AI Book Recommendation Chatbot

React.js, Node.js, Express.js, IBM Watson

GitHub: github.com/Rimjhim117/readora_chatbot | Live: readora-chatbot.onrender.com

- Built conversational AI chatbot using NLP and ML for personalized book recommendations with multi-turn dialogue support
- Integrated IBM Watson Assistant APIs for intent recognition and context-aware conversational flows
- Developed as capstone project for IBM PBEL Virtual Internship

CityScape – Marketplace for Local Goods

Spring Boot, React, TailwindCSS

GitHub: github.com/Rimjhim117/CityScape | Live: cityscape-frontend.onrender.com

- Developed platform enabling users to explore cities and discover local goods
- Implemented secure session-based login and responsive UI using Spring Boot backend with React frontend

Offline Semantic Chat Reply Recommendation System

Python, NLP, Streamlit, Scikit-learn

GitHub: github.com/Rimjhim117/Offline_chat_reply_recommendationsystem

- Built an offline, context-aware chat reply recommendation system using a hybrid matcher combining Sentence-Transformers (all-MiniLM-L6-v2) and TF-IDF with weighted ensemble scoring (70% semantic + 30% keyword)
- Implemented context-aware conversation packing with a 3-message history window and Leave-One-Out cross-validation to prevent data leakage

Recipe Recommendation System

Python, Machine Learning, Streamlit

GitHub: github.com/Rimjhim117/Personalized_Recommendation_System

- Developed hybrid recommendation model combining collaborative and content-based filtering
- Enhanced accuracy using embeddings-based NLP techniques and deployed via Streamlit

Bank Management System

Java, Swing, File I/O

GitHub: github.com/Rimjhim117/BankManagementSystem

- Developed desktop application simulating banking operations including login, deposit, withdrawal, transfer, and loan requests

- Built GUI using Java Swing with admin controls

Portfolio Website

React, Node.js, Express, TailwindCSS

Live: rimjhim-portfolio-mauve.vercel.app

- Built responsive personal portfolio with backend support, project showcase, and contact form
- Deployed on Vercel with modern, animated design

Certifications

1. Core Java — United College of Engineering and Research, Prayagraj	2023
2. Machine Learning — Indian Institute of Information Technology, Allahabad	2024
3. Web Development — Internshala	2024
4. Microsoft Excel — Coursera	2024
5. Python Programming — GUVI (in association with HCL Technologies)	2025
6. Spring Boot — LearnTube.ai	2025
7. Introduction to Modern AI — Cisco Networking Academy	2025
8. Naukri NCAT Certificate — Naukri Campus	2025
9. Tata Crucible Campus Quiz — Tata Group	2025
10. Cloud Computing — NPTEL, IIT Kharagpur	2025

Achievements

-
- Secured **1st Position in CS/AI/ML Department** at *Technovanza 2026 (UGI Project Exhibition)* for “AI-Powered Smart Cloud Kitchen with Personalized Recipe Recommendation System”
 - Published research paper in **IEEE Xplore Digital Library** at RSCM 2025, MANIT Bhopal
 - Visited **Tata Consultancy Services (TCS)** as part of an Industry Visit (Sep 2024), selected among a handful of students from the batch
 - Solved **230+ problems on GeeksforGeeks** (Institute Rank 58) and **126 on LeetCode** (17 Hard)

Competitions & Events

UHACK 4.0

March 2026

United Group of Institutions, Prayagraj — in association with IEEE, Google Developer Groups & Institution's Innovation Council (Ministry of HRD)

- Built and presented the AI-Powered Hybrid Tutor Finder Platform as part of Team DeepThink Labs — see Technical Projects for full details
- Recognized for strong problem-solving abilities, creative thinking, and proactive approach towards innovation and teamwork

Smart India Hackathon (SIH) 2025

2025

Government of India Initiative

- Participated in India's largest hackathon; worked on a problem statement addressing real-world challenges
- Gained experience in collaborative problem-solving, rapid prototyping, and innovation under pressure

HackDiwas 2.0

September 2024

United Group of Institutions

- Participated in hackathon competition focused on innovative tech solutions

Leadership

Project Lead — AI-Powered Smart Cloud Kitchen

2025–2026

Led a team of 2 across full-stack development, ML integration, and deployment; project was IEEE-published and secured 1st position at Technovanza 2026.

Publication

AI-Powered Smart Cloud Kitchen with Personalized Recipe Recommendation System

2025 IEEE 1st International Conference on Recent Trends in Computing and Smart Mobility, MANIT Bhopal

- Published in IEEE Xplore Digital Library
- Proposed and developed an AI-powered cloud kitchen system integrating personalized recipe recommendations using NLP and machine learning
